Experience

Associate AI Engineer Sep 2025 – Present
Samunnati Finance Pvt Ltd. Chennai, India

- Architected a production RAG pipeline on GCP Vertex AI for automated extraction and digitization of Credit Appraisal Memorandums (CAM); engineered an LLM agent with prompt workflows and tool integrations enabling natural language querying over structured financial databases.
- Built an end-to-end financial reconciliation engine with RESTful APIs (FastAPI), automating 7-condition matching (UTR, cheque, amount, reversal) between bank statements and LMS/ERP data — eliminating manual effort across enterprise finance teams.
- Automated enterprise workflows (PDF extraction, email automation, report generation) using Microsoft CoPilot Studio, n8n, and Power Automate; deployed on Azure (Blob, AD, SQL Server) with Docker containerization.

Research Fellow Aug 2024 – Jan 2025
IITI Drishti CPS Foundation, Chanakya UG Fellowship Indore, India

- Developed a lightweight semantic segmentation model for real-time edge deployment, achieving 40% reduction in inference latency and 85%+ accuracy; reduced deployment errors by 20% through iterative architecture refinement.

Research Intern May 2024 – Aug 2024
NIT Warangal Warangal, India

- Benchmarked 3 YOLO variants across 5+ datasets and 10+ scenarios; optimized training pipeline by 30%, enabling evaluation across 1,000+ test images and accelerating model improvement cycles.

Achievements

* Unsupervised Domain Adaptation via Hybrid Image Translation for Low-Light Semantic Segmentation. **CVIP 2025** – Accepted. (Paper ID: 139)

Education

Indian Institute of Information Technology Design and Manufacturing, 2021 – 2025
Kurnool CGPA – 7.5
B.Tech in Artificial Intelligence and Data Science

Sri Chaitanya Junior College, Tirupati 2018 – 2020
Intermediate CGPA – 9.88

Projects

ReconAI – Automated Financial Reconciliation Portal | Python, FastAPI, Azure, Docker, SQL Server

- Production-deployed portal with containerized microservices automating LMS/ERP-to-bank matching using 7-condition logic; integrated Azure Blob Storage, Azure AD SSO, and SQL Server — serving multiple enterprise finance teams.

UDA via Hybrid Image Translation for Low-Light Segmentation | PyTorch, Hugging Face, Computer Vision

- CGAN-based domain adaptation translating 10,000+ annotated day images to night without target domain annotations; achieved 44.1 mIoU on Dark Zurich and 83.92% accuracy with DeepLabV3 on BDD100K — surpassing existing UDA methods.

Skills

Programming Languages	Python, C
GenAI	RAG, Prompt Engineering, LangChain, Google ADK, OpenAI API, GCP Vertex AI, Hugging Face, Vector DB
Automation Tools	n8n, Power Automate, Microsoft CoPilot Studio
Technical Tools	SQL, Power BI, Git, Snowflake, Docker
Technologies	Machine Learning, Deep Learning, Computer Vision
CS Fundamentals	Database Management Systems, Data Structures and Algorithms, Computer Networks

Certifications

- **AI Programming with Python Nanodegree – Udacity, Oct 2024**
- **Machine Learning Specialization – Coursera, Sep 2024**
